Carolina, RI 02812

Quality You Can Count On

The goal of **5 Star Personal Computer Services** is to provide quality professional support and training for all of your personal computer needs while providing the personal, individual attention that you deserve. I have

been in the business for over 34

years and have the knowledge and experience to help computer users with all of their computing needs. Whether it be training, software installation, repairs or upgrades, I will give you the best quality and personal service at very reasonable prices. I will even pick up and deliver your computer for you making your experience with 5 Star Personal Computer Services the most convenient anywhere. No job is too small. Give me a call to find out more of what I can do for you. And if you are experiencing an emergency please call me any time, day or night, 24/7. I will be more than delighted to help you.

Bart Martin, Owner
5 Star Personal Computer Services

Web Page Design-Every business should have a web presence to tell the world who you are. I will create a web site that is custom designed for you at a very affordable price.

Wireless Networking-Do you have more than one computer in your home or office and would like to share the same Internet connection, data, and/or printer? Wireless Networking is the simple, cost effective way to go.

Hardware/software purchase assistance-RAM, gigabytes, DPI, pixels, USB, Firewire, hard drive, floppy drive... do you find computer jargon confusing? I will take the confusion out of purchasing a new computer or peripheral. Based on your needs I will recommend a computer system that will best serve you. Then, either I can shop around to find the best price for you or you can do that yourself since you will then know what to look for. I provide the same service for software.

Basic computer skills instruction-Learn about computer hardware, Windows, Printers, Scanners, burning CD's, making backup copies and much, much, more... lessons are customized to your needs and are done at your home or office.

Basic training on Microsoft Word and Excel-Learn how to type a letter, print an envelope, start a simple spreadsheet and more.

Email and Internet training-Learn how to write and send emails that include attachments such as photos of

loved ones, learn how to surf the World Wide Web and discover the wealth of information it offers.

Help desk-Your computer won't start or freezes, you can't print, you're seeing error messages on your screen, you can't install software or connect to the Internet... what's a person to do? Call me, anytime, day or night. I will be more than happy to fix your problem.

Repairs and Upgrades-CD-ROM drive doesn't work, need more memory, need a larger hard drive? I offer very affordable rates.

Digital photography & scanning-Learn how to put the photos you took with your new digital camera into your computer, how to organize them and print them. If you have a scanner I will show you how to scan and print photos and slides.

Door to door pickup and delivery-as a personal service to you I will pick up your computer and return it upon completion of work, no charge.

Computer Security-I will provide the means or show you how to protect your computer from hackers and viruses.

Customer referral program-If a customer gives me your name I will pay you 10% of whatever I make on the job.
